(a) steep: stability margin
(b) steep: alternation
(c) steep: variance amplification
(d) shallow: stability margin
(e) shallow: alternation
(f) shallow: variance amplification
λ factor 0.45
λ factor 0.55
λ factor 0.65
$M = 1 - \rho(\hat{A})$
lag-1 autocorr. of u_k
$\mathrm{var}(u_k) / \mathrm{var}(u_k)|_{\kappa=0}$
$\kappa/\hat{\kappa}_{\mathrm{crit}}$
